Complete Cable Management For Computers and Home Entertainment Systems

Cable-Safe Co introduces The Complete CABLE MANAGER, an entirely new concept in cable management.

The Complete CABLE MANAGER lifts all cable clutter off the floor and creates an under-the-desk shelf to stack hubs, power adapters or other small devices. Once installed, nothing, not even the power strip, remains on the floor. Cables and devices are removed from direct sight and floors are now easy to clean.

All cables are labeled and organized in neat tangle-free bundles allowing every cable to be quickly traced, moved or replaced. The system mounts on any style of office furniture or home entertainment center shelving. It clamps securely through a grommet hole or on the lip of a desk or shelf. It can also be mounted with screws directly to any vertical or horizontal surface.

Built of durable re-enforced nylon it easily supports 10 lbs and can be configured to organize just a few cables to a complex array of many cables.

The Complete CABLE MANAGER KIT contains everything needed to organize 10-12 cables as well as their supporting devices. It includes the shelf and hook system, 12 sets of cable labels, 18 cable straps, 4 cable-clips 3 quick-lock bungee straps and easy-to-follow graphic instructions. And Expansion Kit can be added to double the organizing capacity to 30 cables.

Complete CABLE MANAGER Suggested Retail: \$34.95
Expansion Kit Suggested Retail: \$ 22.95
